

EXTENDED COVERAGE

KEEP YOUR DETROIT® ENGINE JOBSITE-READY FOR YEARS TO COME

Delayed completion of jobs due to down vocational trucks can lead to unhappy customers, potentially damaging brand reputation and loyalty. Extended Coverage for Detroit® engines keeps your trucks running reliably through challenging environments long after their base manufacturer warranties expire. Unlike third-party warranty providers, our OEM-backed coverage means engine repair work is OEM pre-approved, eliminating potential long waiting times for out-of-pocket repairs to be authorized.

1

Choose from three levels of coverage: Basic Engine, Enhanced Engine, and Ultimate Engine. With a variety of term/mileage options, you can build a specific plan and pay a price that best suits your business needs and application.

2

Repair work is OEM pre-approved, eliminating potential long waiting times for out-of-pocket repairs to be authorized. Both parts and labor are covered.

3

Continue to rely on your same Freightliner® or Western Star® service center. If you're on the road, you have access to 500+ factory-authorized facilities throughout the U.S. and Canada.

4

Ease budget challenges by rolling the cost of your Extended Coverage into your truck's monthly payment.

WHAT IS IT?

Extended Coverage for Detroit Engines extends your protection for years/engine hours beyond the factory warranty period. Plans are tiered, allowing you to choose a plan that best suits your business needs and construction application.

WHY IS IT VALUABLE?

OEM-backed Extended Coverage is the best way to control unexpected repair costs as well as the added business costs of downtime as your truck ages. The cost of an Extended Coverage plan can be far less than the cost of a few failures. It's also a smart business strategy for controlling inflation as the overall cost of truck repairs is increasing. You'll lock in today's parts and labor costs for tomorrow's repairs. What's more, you can pass coverage on to future owners without fees, enhancing your truck's resale value.

WHAT PACKAGES ARE OFFERED?

Coverage applies to DD5[®], DD8[®], DD13[®], DD15[®], and DD16[®]. Plans range from 2 years to 7 years and 100,000 miles/161,000 km/3,000 hours to 750,000 miles/1,207,500 km/22,700 hours. Plans are tiered so you can choose the level of coverage that best suits your needs and vehicle application. **Ask about our Extended Coverage for truck chassis.**
