Part availability display – Primary dealer’s part availability will show on the product listing page, no click required

When customers search for a part, they will now be able to see their primary fulfilling dealer’s availability on the product listing page without having to click on the “View Availability” button.

- If there is stock available, the quantity available will show in green
- If there is no stock available the quantity will show in red
- The customer will be able to see where the part will be shipping from on the same line that shows what quantity is available
- The “View More Availability” (previously called “View Availability”) button will still be present and will allow the customer to see available stock in other locations

In addition, Quick Order will now display availability for the customer’s primary location when a part is entered.

- The customer will be able to see where the part will be shipping from on the same line that shows what quantity is available
- The “View More Availability” (previously called “View Availability”) button will still be present and will allow the customer to see available stock in other locations

Quick Order							
Part ID	Description	Shipping Location	Available QTY	Qty	Unit Price	Extended Price	
UTA 8685740LE25WJ	 CRANK ARM		0	1			Part may be placed on backorder. View More Availability

Enhanced BOM View

Ready to have a better view when searching for Bill of Materials? We've got you covered. We added a drop down menu for your BOMs. The drop down menu will show the sub group/Module code in an A-Z order.

Bom description, sorting all works expected for MC, serials as well

Alternatives have been added to Excelerator

In this update, we have improved finding an alternative part by making more recommended alternatives available within Excelerator. Alternatives can be found after searching for a part or when viewing a Bill of Material.

To check if there is a recommended alternative for a part number, simply click on the “Alternative Products” link. Recommended alternatives will be displayed automatically along with the price and availability from your Dealer. To view additional parts in the carousel use either the left and right scroll arrows or the page navigation buttons.

Alternatives can be added to your cart by clicking the “Add to Cart” button.

The screenshot displays the Excelerator interface for a brake drum. At the top, an "Exact Match" section shows the part "GUN 3600AX" (16.50X7.00 BRAKE DRUM) with a price and availability status of "0 Qty available at" and a note "Part may be placed on backorder." Below this, a link for "Alternative Products" is highlighted with a red arrow. The main section is a carousel with two "Best Fit" alternatives:

- ABP N42A1657B** (DRUM - 16.5X7 BALANCED): Price (each): [redacted], 0 Qty available at [redacted], Part may be placed on backorder. View More Availability. VMRS: 013-002-023 - DRUM - REAR BRAKE. Includes an "Add to Cart" button.
- ABP N42A1657NB** (DRUM - 16.5X7 UNBALANCED): Price (each): [redacted], 0 Qty available at [redacted], Part may be placed on backorder. View More Availability. VMRS: 013-001-023 - DRUM - FRONT BRAKE. Includes an "Add to Cart" button.

Red arrows also point to the "Add to Cart" buttons and the carousel navigation arrows at the bottom.

SuperUser Restore Cart Functionality

One highly anticipated update is the SuperUser Restore Cart Functionality. As of September 21st, this enhancement allows any SuperUser to restore a cart on behalf of their customer. Simply shop as a customer and navigate to their Saved Carts where you then can select the Restore button.

Search by Part Number or Description

My Account

- Personal Details
- My Address
- Saved Carts**
- Order History
- Forward Order Emails
- Change Password
- Marketing
- Privacy

< Saved Cart Details

Name	Cart ID	Date Saved	Items
Saved cart	21018111	Oct 1, 2020	1

Description
A super user saved your previous cart.

Details	Qty	Your Price	Core Charge	Extended Price
 12-22886-000 ★ CLAMP	1		\$0.00	

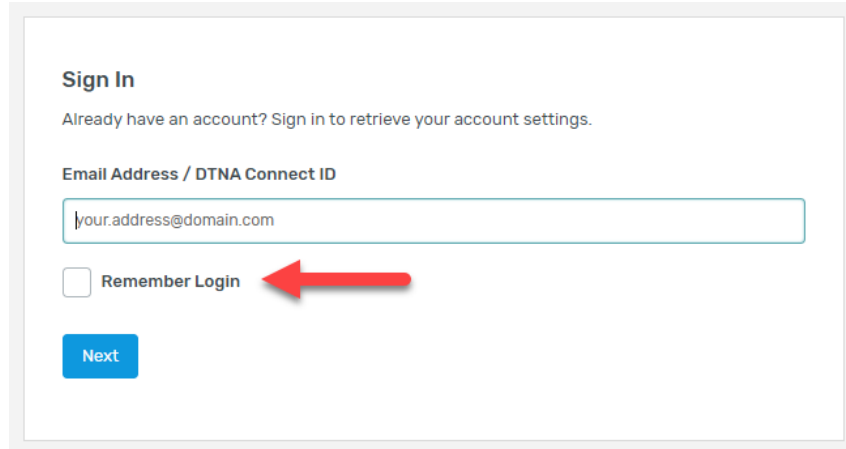

Promotions and totals reflect what existed at the time the cart was saved. Promotions and totals may change or no longer apply when the cart is restored.

Restore Edit

Restore Back to Saved Carts

“Remember Me” functionality removed from Excelerator

Based on your feedback, the “Remember Me” button on the Sign In page has been removed.

The screenshot shows a 'Sign In' form with the following elements:

- Sign In** header
- Text: "Already have an account? Sign in to retrieve your account settings."
- Label: "Email Address / DTNA Connect ID"
- Input field containing "your.address@domain.com"
- Checkbox labeled "Remember Login" with a red arrow pointing to it, indicating its removal.
- Blue "Next" button

Excelerator Timeout Limit Increased to 2 Hours

We have extended the amount of time you can be away from your Excelerator screen before it automatically signs you out. This will be especially helpful for front counter users.
